

Technology-watch assignator V3

For realise this project all what you have already studied before holidays are authorize (Express, EJS, MongoDB, framework Bootstrap...etc).
This is not a step-by-step project. You must use the knowledge you acquire (and maybe the example of previous exercises you have) for go the more far away you can on the realisation of this project.

Good luck!

Subject:

General:

Each page is compose by a header, menu and footer as in the pdf maquette.

Home:

The home page should display first a general menu for access to other pages.

Followed by another section displaying a welcome message (example on the pdf maquette).

Next another section displays the two next tech-watch.

And the final section displays the list of students they haven't been assigned yet to a tech-watch.

Student List:

The student list page displays an array with the name of all the students register.

Followed by a section constitute by a form who give the possibility to add or delete student.

For add a student, the user must enter a name into an input case and click on the "add" button.

For delete a student a list let the user select a name. Once the name of a student has been selected, the user must click on "delete" button.

TechWatch assignation:

Tech watch assignation page should display all the next tech watch registered in the first section.

The next section is a form. This form will be is composed by three fields.

First one is the subject of the tech-watch; second one the deadline and last one the number of students they will participate to this tech-watch.

History:

The history page is composed by two section. First one list all the tech watch from today to the future and the second one all the tech watch with a deadline already passed.
